RUBY ON RAILS, REACT, REDUX, PostgreSQL, HTML5, CSS3

An Airbnb-inspired app created using React/Redux on the frontend and Rails on the backend.

- Featured search for listings by geolocation through Google Maps API Place Autocomplete widget
- Achieved a sleek and responsive design featuring collapsible widgets, interactive modals, and animated micro-interactions using React, JavaScript, and CSS3
- Utilized React Lifecycle methods and a normalized Redux state in order to execute lazy loading of of database information while increasing overall scalability

memery Live | GitHub

JAVASCRIPT, HTML5, CSS3

An interactive single-player JavaScript game.

- Built with only vanilla JavaScript to provide users with dynamic gameplay
- Installed or removed event listeners dynamically based on whether cards matched or not

js-domination Live | GitHub

JAVASCRIPT, HTML5, CSS3

A lightweight alternative to jQuery

- Abstracts native Document Object Model (DOM) into JavaScript objects in order to optimally send AJAX requests, handle events, and manipulate DOM elements
